PROFESSIONAL
CERAMIC COATINGS
& ACCESSORIES

C-COAT COATINGS PROVIDE A LONG-LASTING PROTECTION FOR THE CAR, WHETHER THE PROTECTION OF THE PAINT OR THE BOOST OF THE PERFORMANCE AND LONGEVITY OF PAINT PROTECTION FILMS.

The ceramic coatings can be used both directly on the paint and on surfaces with paint protection film. Their hydrophobic effect makes the car extremely easy to clean, and they are able to keep contamination from penetrating the deeper layers of the film.

Professional grade ceramic coating. Can be used as a maintenance product for C-COAT Elite every second year or as a main coating. Makes the car easier to clean and protects against severe contamination.

Fast curing time
Extremely hydrophobic
Durability up to 3 years

How to use:
Split larger areas into smaller sections, starts hardening rapidly. Linear motion, no cross action needed. Curing time is 24 hours.
For PPF and car wrap films, use rather C-COAT VALUE or C-COAT ELITE.

Entry level ceramic coating. Can be used as an annual renewing coating for C-COAT Pro, or as a main coating for a shorter period.

Extremely hydrophobic!
Excellent for paint protection films and car wrapping films!
Easy application
Durability up to 12 months

How to use:
Easy to apply and to wipe off, can be applied on paint, chrome, wheels, and plastic. The extremely hydrophobic effect makes it ideally suited for protecting surfaces with paint protection films and car wrapping films, as enhancing hydrophobicity is one of the primary criteria on cars with films on them.

Premium grade ceramic coating, top of the line in the C-COAT range. Makes the car super easy to clean and gives the strongest protection against severe contamination.

How to use:
Can be applied on larger surfaces in one run - there is no need to split larger areas into smaller sections. Apply in linear motion, no need for cross action application. Can be wiped off immediately.

Top of the line in the C-Coat range
Extremely stable
Easy application
Durability up to 5 years

Especially designed for spreading ceramic coatings, the C-COAT Spreader is an ultimate solution for ceramic coating application.

Lint free

Speeds up the coating process and saves coating volume during application.

Streak free

Machine-washable with neutral chemicals. Do not use bleach or softener.

Low absorbing

Consumption:

1 box (3 pcs) for a full car.

Premium grade microfiber cloth for buffing coatings and compounds. The short pile side is suitable for wiping off, the long pile side for buffing the coating.

Consumption: generally 6 to 8 cloths for a full car
Machine-washable with neutral chemicals.
Do not use bleach or softener.
